(54) FLYING OBJECT

(57) Abstract:

PURPOSE: A flying object is provided to achieve a multi -purpose object capable of flying according to the rotation of a propeller by oneself so as to be used as a play appliance for children or a lighting device. CONSTITUTION: The flying object is comprised of a flying body(10) of saucer form having a vertical penetrating passage in the middle portion thereof; a motor installed in the center of the vertical penetrating passage with being supported by a support; a propeller (18) coupled to the motor; a power source installed in the flying body; and a control part installed in the flying body so as to control the propeller. Additionally, plural illuminators(26,28) are coupled on the outer surface of the flying body.
